Reporting Service

Paris, 1996-12-01

Reporting Service 1996, No. 12

CONTENTS

- 96/225** - EPPO Reporting Service Index
96/226 - Directory of Plant Protection Services of EPPO Member Countries

EPPO *Reporting Service*

96/225 EPPO Reporting Service Index

The following index covers all Reporting Service articles from 1996-01-01 to 1996-12-31.

Acrobasis pirivorella

96/120 - Geographical distribution of Russian A2 quarantine pests in Russia: insects and nematodes

Acroptilon repens

96/126 - Geographical distribution of Russian A2 quarantine pests in Russia: pathogens and weeds

Agrilus mali

96/120 - Geographical distribution of Russian A2 quarantine pests in Russia: insects and nematodes

Albania

96/074 - Phytosanitary situation of fruit crops in Albania

Aleurodicus dispersus

96/031 - Citrus whiteflies in Spain

96/044 - 19th Session of the Asia and Pacific Plant Protection Commission (APPPC)

Alternaria mali

96/128 - First report of *Alternaria mali* in Yugoslavia

96/129 - EPPO Distribution List for *Alternaria mali*

96/201 - Additions and deletions to the EPPO A1 and A2 quarantine lists

Ambrosia artemisiifolia, *A. psilostachya*, *A. trifida*

96/126 - Geographical distribution of Russian A2 quarantine pests in Russia: pathogens and weeds

Anastrepha fraterculus

96/066 - Development of traps for *Ceratitis capitata* and *Anastrepha ludens*

96/087 - New data on pests of quarantine importance

96/092 - *Anastrepha* species trapped in tropical orchards in Mexico

Anastrepha ludens

96/027 - *Anastrepha ludens* trapped in California (US)

96/066 - Development of traps for *Ceratitis capitata* and *Anastrepha ludens*

96/092 - *Anastrepha* species trapped in tropical orchards in Mexico

Anastrepha obliqua

96/066 - Development of traps for *Ceratitis capitata* and *Anastrepha ludens*

96/092 - *Anastrepha* species trapped in tropical orchards in Mexico

96/125 - New data on pests and diseases of quarantine importance

Anastrepha striata

96/066 - Development of traps for *Ceratitis capitata* and *Anastrepha ludens*

96/092 - *Anastrepha* species trapped in tropical orchards in Mexico

Anastrepha serpentina

EPPO Reporting Service

- 96/066 - Development of traps for *Ceratitis capitata* and *Anastrepha ludens*
96/092 - *Anastrepha* species trapped in tropical orchards in Mexico

Andean potato latent tymovirus

- 96/098 - First report of Andean potato latent tymovirus in *Ullucus tuberosus*

Andean strain of potato S carlavirus

- 96/035 - Specific ELISA detection of the Andean strain of potato S carlavirus

Anoplophora chinensis

- 96/156 - Control of *Anoplophora chinensis* in China

Anoplophora glabripennis

- 96/214 - Introduction of *Anoplophora glabripennis* in New York State (US)

Anoplophora malasiaca

- 96/118 - Biology of *Anoplophora malasiaca*

Anthonomus quadrigibbus, A. signatus

- 96/209 - Details on the geographical distribution of beetles of quarantine importance in Canada and Alaska

Aonidiella aurantii, A. citrina

- 96/079 - Resistance of *Aonidiella aurantii* and *A. citrina* to organophosphates and carbamates

Aphelenchoides besseyi

- 96/076 - *Radopholus similis* and *Aphelenchoides besseyi* detected in Italy
96/088 - Information of pests and diseases of quarantine importance in Slovakia

Apiosporina morbosa

- 96/119 - Control of *Apiosporina morbosa*

APPPC

- 96/044 - 19th Session of the Asia and Pacific Plant Protection Commission (APPPC)

Arabis mosaic nepovirus

- 96/094 - Detection of arabis mosaic nepovirus in Austria

Arceuthobium americanum

- 96/097 - First report of *Arceuthobium americanum* on *Abies lasiocarpa*

Artioposthia triangulata

- 96/042 - Potential spread of *Artioposthia triangulata* (New Zealand flatworm) and *Australoplana sanguinea* var. *alba* to continental Europe

Arrhenodes minutus

- 96/209 - Details on the geographical distribution of beetles of plant quarantine importance in Canada and Alaska

EPPO Reporting Service

Australia

- 96/043 - New data on diseases of quarantine importance
- 96/044 - 19th Session of the Asia and Pacific Plant Protection Commission (APPPC)
- 96/204 - New data on pests and diseases of plant quarantine importance

Australoplana sanguinea var. alba

- 96/042 - Potential spread of Artioposthia triangulata (New Zealand flatworm) and Australoplana sanguinea var. alba to continental Europe

Austria

- 96/002 - Situation of Burkholderia (Pseudomonas) solanacearum in the EPPO region
- 96/094 - Detection of arabis mosaic nepovirus in Austria
- 96/095 - Survey on grapevine viruses in Canada
- 96/175 - Recent studies on peach latent mosaic viroid

Bactrocera carambolae

- 96/063 - Situation of Bactrocera carambolae in Suriname, Guyana and French Guiana

Bactrocera cucurbitae

- 96/056 - Quarantine treatment to control Ceratitis capitata, Bactrocera cucurbitae and B. dorsalis in papaya
- 96/057 - Quarantine treatment to control Ceratitis capitata, Bactrocera cucurbitae and B. dorsalis in carambola
- 96/065 - Geographical distribution of Bactrocera cucurbitae and Dacus ciliatus
- 96/067 - EPPO Distribution List of Bactrocera cucurbitae
- 96/087 - New data on pests of quarantine importance
- 96/204 - New data on pests and diseases of plant quarantine importance

Bactrocera dorsalis

- 96/026 - Bactrocera dorsalis trapped in California and Florida (US)
- 96/056 - Quarantine treatment to control Ceratitis capitata, Bactrocera cucurbitae and B. dorsalis in papaya
- 96/057 - Quarantine treatment to control Ceratitis capitata, Bactrocera cucurbitae and B. dorsalis in carambola
- 96/087 - New data on pests of quarantine importance
- 96/204 - New data on pests and diseases of plant quarantine importance

Bactrocera minax

- 96/117 - Gamma irradiation of Bactrocera minax larvae

Bactrocera papayae

- 96/044 - 19th Session of the Asia and Pacific Plant Protection Commission (APPPC)
- 96/116 - Bactrocera papayae and B. tryoni trapped in New Zealand

Bactrocera tryoni

- 96/044 - 19th Session of the Asia and Pacific Plant Protection Commission (APPPC)
- 96/116 - Bactrocera papayae and B. tryoni trapped in New Zealand

Barley stripe mosaic hordeivirus

- 96/043 - New data on diseases of quarantine importance

EPPO *Reporting Service*

96/088 - Information of pests and diseases of quarantine importance in Slovakia

Barley yellows

96/173 - New virus disease of barley in Switzerland

Bean golden mosaic geminivirus

96/195 - New and detailed records for Brazil

Beet curly top geminivirus

96/151 - Beet curly top geminivirus is present on *Capsicum annuum* in Oregon (US)

96/152 - Weeds naturally infected by beet curly top geminivirus

Beet leaf curl rhabovirus

96/088 - Information of pests and diseases of quarantine importance in Slovakia (eradicated)

Beet necrotic yellow vein furovirus

96/010 - Situation of beet necrotic yellow vein furovirus in Hungary

Belgium

96/002 - Situation of *Burkholderia (Pseudomonas) solanacearum* in the EPPO region

96/183 - Absence of *Burkholderia (Pseudomonas) solanacearum* in Belgium

Bemisia tabaci

96/044 - 19th Session of the Asia and Pacific Plant Protection Commission (APPPC)

96/088 - Information of pests and diseases of quarantine importance in Slovakia

96/112 - First report of tomato yellow leaf curl geminivirus and *Bemisia tabaci* in Portugal

96/125 - New data on pests and diseases of quarantine importance

Bemisia tabaci biotype B

96/044 - 19th Session of the Asia and Pacific Plant Protection Commission (APPPC)

96/053 - *Bemisia tabaci* biotype B in the Pacific region

96/170 - Chlorotic streak of *Capsicum annuum*: new disorder induced by *Bemisia tabaci* biotype B

Benin

96/125 - New data on pests and diseases of quarantine importance

Bermuda

96/125 - New data on pests and diseases of quarantine importance

Biological control

96/140 - Potential of *Orius sauteri* as a biocontrol agent against *Thrips palmi*

Biology

96/058 - Survival of *Ceratocystis fimbriata* var. *platani* in the soil

96/072 - Studies on transmission of blue-stain fungi by *Ips pini*

96/077 - Effects of host plants and temperature on the development of *Thrips palmi*

96/080 - Studies on the biology of *Unaspis citri*

96/118 - Biology of *Anoplophora malasiaca*

96/139 - Studies on seed-transmission of *Pantoea (Erwinia) stewartii* subsp. *stewartii*

96/152 - Weeds naturally infected by beet curly top geminivirus

EPPO Reporting Service

- 96/155 - Studies on development rate of *Diabrotica barberi*
- 96/170 - Chlorotic streak of *Capsicum annuum*: new disorder induced by *Bemisia tabaci* biotype B
- 96/174 - Further studies on the non-transmission of plum pox potyvirus by pollen and seed
- 96/190 - Spatial distribution of *Synchytrium endobioticum* in the soil
- 96/191 - Wind dispersal of resting spores of *Synchytrium endobioticum*
- 96/192 - *Synchytrium endobioticum* spores transported by car
- 96/198 - Tospoviruses and thrips
- 96/199 - Transmissibility of *Bursaphelenchus xylophilus* from wood chips to *Pinus* seedlings and stumps
- 96/217 - Studies on traps and attractants for *Ceratitis capitata*
- 96/218 - Overwintering of *Ceratitis capitata* in Northern Greece
- 96/219 - Genetic studies on *Fusarium oxysporum* f. sp. *albedinis*

Brazil

- 96/043 - New data on diseases of quarantine importance
- 96/055 - Tomato spotted wilt tospovirus causes a serious disease of chickpea (*Cicer arietinum*) in Brazil
- 96/082 - Chrysanthemum stem necrosis possibly due to a new tospovirus
- 96/087 - New data on pests of quarantine importance
- 96/091 - First report of *Thrips palmi* in Brazil
- 96/169 - First report of *Xylella fastidiosa* in coffee
- 96/175 - Recent studies on peach latent mosaic viroid
- 96/195 - New and detailed records for Brazil
- 96/196 - Situation of *Xylella fastidiosa* in Brazil
- 96/197 - Occurrence of *Heterodera glycines* in the State of São Paulo (BR)

Bulgaria

- 96/002 - Situation of *Burkholderia (Pseudomonas) solanacearum* in the EPPO region

Burkholderia caryophylli

- 96/043 - New data on diseases of quarantine importance
- 96/086 - Name changes for bacteria

Burkholderia solanacearum

- 96/001 - *Burkholderia (Pseudomonas) solanacearum* found again in the Netherlands
- 96/002 - Situation of *Burkholderia (Pseudomonas) solanacearum* in the EPPO region
- 96/022 - Situation of *Burkholderia (Pseudomonas) solanacearum* in France and Portugal
- 96/044 - 19th Session of the Asia and Pacific Plant Protection Commission (APPPC)
- 96/086 - Name changes for bacteria
- 96/090 - Situation of *Burkholderia (Pseudomonas) solanacearum* in Cyprus and Morocco
- 96/182 - Situation of *Burkholderia (Pseudomonas) solanacearum* in the Netherlands
- 96/183 - Absence of *Burkholderia (Pseudomonas) solanacearum* in Belgium
- 96/184 - EPPO Distribution List for *Burkholderia solanacearum*
- 96/195 - New and detailed records for Brazil

Bursaphelenchus xylophilus

- 96/045 - Differentiation of three *Bursaphelenchus* species by RAPD-PCR
- 96/168 - First report of *Bursaphelenchus xylophilus* in Oregon (US)
- 96/199 - Transmissibility of *Bursaphelenchus xylophilus* from wood chips to *Pinus* seedlings and stumps
- 96/208 - Situation of *Bursaphelenchus xylophilus* and *Monochamus alternatus* in Korea Republic

EPPO Reporting Service

Cacoecimorpha pronubana

96/212 - Cacoecimorpha pronubana found on Pinus halepensis in Spain

Cameraria ohridella

96/211 - A new pest of horse chestnut: Cameraria ohridella

Cameroon

96/110 - New records of Liriomyza sativae in Asia and Africa

Canada

96/095 - Survey on grapevine viruses in Canada

96/099 - Puccinia horiana in North America

96/167 - Ips typographus reported in Canada

96/209 - Details on the geographical distribution of beetles of plant quarantine importance in Canada and

Alaska

Carposina niponensis

96/087 - New data on pests of quarantine importance

96/120 - Geographical distribution of Russian A2 quarantine pests in Russia: insects and nematodes

Ceratitis capitata

96/056 - Quarantine treatment to control Ceratitis capitata, Bactrocera cucurbitae and B. dorsalis in papaya

96/057 - Quarantine treatment to control Ceratitis capitata, Bactrocera cucurbitae and B. dorsalis in carambola

96/064 - Eradication of Ceratitis capitata in Chile

96/066 - Development of traps for Ceratitis capitata and Anastrepha ludens

96/069 - EPPO Distribution List for Ceratitis capitata, C. cosyra and C. rosa

96/115 - Ceratitis capitata trapped in New Zealand

96/120 - Geographical distribution of Russian A2 quarantine pests in Russia: insects and nematodes

96/154 - Detection of irradiated Ceratitis capitata

96/166 - Ceratitis capitata is not present in Suriname

96/217 - Studies on traps and attractants for Ceratitis capitata

96/218 - Overwintering of Ceratitis capitata in Northern Greece

Ceratitis cosyra

96/069 - EPPO Distribution List for Ceratitis capitata, C. cosyra and C. rosa

96/087 - New data on pests of quarantine importance

96/204 - New data on pests and diseases of plant quarantine importance

Ceratitis rosa

96/069 - EPPO Distribution List for Ceratitis capitata, C. cosyra and C. rosa

Ceratocystis fagacearum

96/037 - Studies on the possible use of sulfuryl fluoride fumigation against Ceratocystis fagacearum

Ceratocystis fimbriata var. platani

96/058 - Survival of Ceratocystis fimbriata var. platani in the soil

96/088 - Information of pests and diseases of quarantine importance in Slovakia

EPPO *Reporting Service*

Cherry leaf roll nepovirus

- 96/043 - New data on diseases of quarantine importance
- 96/088 - Information of pests and diseases of quarantine importance in Slovakia
- 96/204 - New data on pests and diseases of plant quarantine importance

Cherry lethal yellows

- 96/081 - New phytoplasma associated with cherry lethal yellows in China

Cherry little cherry disease

- 96/172 - Situation of cherry little cherry disease in Germany

Chile

- 96/051 - *Phytophthora fragariae* var. *rubri* found in Chile
- 96/064 - Eradication of *Ceratitis capitata* in Chile
- 96/158 - *Heterodera glycines* is not present in Chile

China

- 96/044 - 19th Session of the Asia and Pacific Plant Protection Commission (APPPC)
- 96/081 - New phytoplasma associated with cherry lethal yellows in China
- 96/087 - New data on pests of quarantine importance
- 96/156 - Control of *Anoplophora chinensis* in China

Ciborinia camelliae

- 96/044 - 19th Session of the Asia and Pacific Plant Protection Commission (APPPC)

Citrus blight disease

- 96/043 - New data on diseases of quarantine importance
- 96/047 - Citrus blight is present in the Dominican Republic
- 96/201 - Additions and deletions to the EPPO A1 and A2 quarantine lists

Citrus greening bacterium

- 96/032 - Proposed names for citrus greening bacterium and lime witches' broom phytoplasma
- 96/044 - 19th Session of the Asia and Pacific Plant Protection Commission (APPPC)

Citrus mosaic disease

- 96/137 - Citrus mosaic disease in India is associated with a badnavirus

Citrus ringspot virus

- 96/125 - New data on pests and diseases of quarantine importance

Citrus tristeza closterovirus

- 96/009 - Citrus tristeza closterovirus is present in St Lucia
- 96/030 - Present situation of citrus tristeza closterovirus in Spain
- 96/046 - First report of citrus tristeza closterovirus in Louisiana (US)
- 96/204 - New data on pests and diseases of plant quarantine importance
- 96/215 - Update on the situation of citrus tristeza closterovirus in Mexico
- 96/216 - Situation of citrus tristeza closterovirus in Cyprus

Clavibacter michiganensis subsp. insidiosus

- 96/088 - Information of pests and diseases of quarantine importance in Slovakia

EPPO Reporting Service

Clavibacter michiganensis subsp. michiganensis

- 96/039 - Soil solarization to control *Clavibacter michiganensis* subsp. *michiganensis*
96/194 - Recent findings of *Clavibacter michiganensis* subsp. *michiganensis*, plum pox potyvirus and *Xanthomonas fragariae* in the Netherlands

Clavibacter michiganensis subsp. sepedonicus

- 96/008 - *Clavibacter michiganensis* subsp. *sepedonicus* is not present in Romania
96/171 - Comparison of PCR, ELISA and DNA hybridization for the detection of *Clavibacter michiganensis* subsp. *sepedonicus*
96/185 - Situation of *Clavibacter michiganensis* subsp. *sepedonicus* in Spain
96/186 - Situation of *Clavibacter michiganensis* subsp. *sepedonicus* in Czech Republic

Cochliobolus heterostrophus

- 96/126 - Geographical distribution of Russian A2 quarantine pests in Russia: pathogens and weeds

Colletotrichum acutatum

- 96/044 - 19th Session of the Asia and Pacific Plant Protection Commission (APPPC)
96/133 - First report of *Colletotrichum acutatum* in Israel
96/134 - *Colletotrichum acutatum* on ornamental lupin in United Kingdom
96/195 - New and detailed records for Brazil
96/204 - New data on pests and diseases of plant quarantine importance

Colombia

- 96/043 - New data on diseases of quarantine importance
96/087 - New data on pests of quarantine importance
96/125 - New data on pests and diseases of quarantine importance

Conferences

- 96/020 - 4th International EFPP Symposium - Diagnosis and Identification of Plant Pathogens
96/103 - Workshop on *Diabrotica virgifera*, Hódmezővásárhely (HU), 1996-03-19
96/180 - Fourth International Conference on Pests in Agriculture
96/223 - Second International Conference on Soil Solarization and Integrated Management of Soilborne Pests
96/224 - 10th Congress of the Mediterranean Phytopathological Union

Conotrachelus nenuphar

- 96/209 - Details on the geographical distribution of beetles of plant quarantine importance in Canada and Alaska

Control methods

- 96/039 - Soil solarization to control *Clavibacter michiganensis* subsp. *michiganensis*
96/083 - Methyl iodide could replace methyl bromide as a soil fumigant
96/119 - Control of *Apiosporina morbosa*
96/156 - Control of *Anoplophora chinensis* in China

Cook Islands

- 96/053 - *Bemisia tabaci* biotype B in the Pacific region

Costa Rica

EPPO Reporting Service

- 96/043 - New data on diseases of quarantine importance
96/204 - New data on pests and diseases of plant quarantine importance

Côte d'Ivoire

- 96/087 - New data on pests of quarantine importance

Cotton leaf curl geminivirus

- 96/044 - 19th Session of the Asia and Pacific Plant Protection Commission (APPPC)

Croatia

- 96/002 - Situation of *Burkholderia (Pseudomonas) solanacearum* in the EPPO region
96/004 - First report of fireblight in Croatia
96/005 - First report of *Diabrotica virgifera* in Croatia
96/087 - New data on pests of quarantine importance
96/163 - Information on pests and diseases of quarantine importance in Croatia

Cuba

- 96/121 - News from the Diagnostic Centre of the Dutch Plant Protection Service

Curtobacterium flaccumfaciens pv. flaccumfaciens

- 96/195 - New and detailed records for Brazil

Cuscuta spp.

- 96/126 - Geographical distribution of Russian A2 quarantine pests in Russia: pathogens and weeds

Cydia molesta

- 96/120 - Geographical distribution of Russian A2 quarantine pests in Russia: insects and nematodes

Cydia prunivora

- 96/204 - New data on pests and diseases of plant quarantine importance

Cyprus

- 96/002 - Situation of *Burkholderia (Pseudomonas) solanacearum* in the EPPO region
96/090 - Situation of *Burkholderia (Pseudomonas) solanacearum* in Cyprus and Morocco
96/216 - Situation of citrus tristeza closterovirus in Cyprus

Czech Republic

- 96/002 - Situation of *Burkholderia (Pseudomonas) solanacearum* in the EPPO region
96/089 - Czech Republic: occurrence of *Liriomyza huidobrensis* and eradication of *Helicoverpa armigera*
96/186 - Situation of *Clavibacter michiganensis* subsp. *sepedonicus* in Czech Republic
96/204 - New data on pests and diseases of plant quarantine importance

Dacus ciliatus

- 96/065 - Geographical distribution of *Bactrocera cucurbitae* and *Dacus ciliatus*
96/068 - EPPO Distribution List for *Dacus ciliatus*

Dendroctonus adjunctus

- 96/210 - Forest insects present in Mexico

EPPO Reporting Service

Dendroctonus brevicomis

- 96/209 - Details on the geographical distribution of beetles of plant quarantine importance in Canada and Alaska
96/210 - Forest insects present in Mexico

Dendroctonus frontalis

- 96/210 - Forest insects present in Mexico

Dendroctonus ponderosae

- 96/209 - Details on the geographical distribution of beetles of plant quarantine importance in Canada and Alaska
96/210 - Forest insects present in Mexico

Dendroctonus pseudotsugae

- 96/209 - Details on the geographical distribution of beetles of plant quarantine importance in Canada and Alaska
96/210 - Forest insects present in Mexico

Dendroctonus rufipennis

- 96/073 - Outbreak of Dendroctonus rufipennis in Alaska (US)
96/209 - Details on the geographical distribution of beetles of plant quarantine importance in Canada and Alaska

Denied records

- 96/008 - Clavibacter michiganensis subsp. sepedonicus is not present in Romania
96/029 - Tilletia controversa is not present in Germany
96/090 - Situation of Burkholderia (Pseudomonas) solanacearum in Cyprus and Morocco
96/109 - Potato spindle tuber viroid is not present in Japan
96/125 - New data on pests and diseases of quarantine importance
96/158 - Heterodera glycines is not present in Chile
96/166 - Ceratitis capitata is not present in Suriname

Denmark

- 96/002 - Situation of Burkholderia (Pseudomonas) solanacearum in the EPPO region

Detailed records

- 96/006 - Situation of Diabrotica virgifera in Serbia (YU)
96/007 - Situation of Diabrotica virgifera in Hungary
96/010 - Situation of beet necrotic yellow vein furovirus in Hungary
96/016 - Tomato spotted wilt tospovirus occurs in Louisiana (US)
96/023 - Fireblight foci in Puy-de-Dôme (FR)
96/026 - Bactrocera dorsalis trapped in California and Florida (US)
96/027 - Anastrepha ludens trapped in California (US)
96/030 - Present situation of citrus tristeza closterovirus in Spain
96/031 - Citrus whiteflies in Spain
96/043 - New data on diseases of quarantine importance
96/044 - 19th Session of the Asia and Pacific Plant Protection Commission (APPPC)
96/046 - First report of citrus tristeza closterovirus in Louisiana (US)

EPPO Reporting Service

- 96/063 - Situation of *Bactrocera carambolae* in Suriname, Guyana and French Guiana
- 96/065 - Geographical distribution of *Bactrocera cucurbitae* and *Dacus ciliatus*
- 96/071 - Occurrence of *Malacosoma disstria* in Pennsylvania (US)
- 96/072 - Studies on transmission of blue-stain fungi by *Ips pini*
- 96/073 - Outbreak of *Dendroctonus rufipennis* in Alaska (US)
- 96/075 - Situation of peach latent mosaic viroid in Campania (IT)
- 96/076 - *Radopholus similis* and *Aphelenchoides besseyi* detected in Italy
- 96/087 - New data on pests of quarantine importance
- 96/088 - Information of pests and diseases of quarantine importance in Slovakia
- 96/090 - Situation of *Burkholderia (Pseudomonas) solanacearum* in Cyprus and Morocco
- 96/093 - *Xanthomonas arboricola* pv. *pruni* (*X. campestris* pv. *pruni*) found in peach orchards in Lazio (IT)
- 96/095 - Survey on grapevine viruses in Canada
- 96/099 - *Puccinia horiana* in North America
- 96/120 - Geographical distribution of Russian A2 quarantine pests in Russia: insects and nematodes
- 96/125 - New data on pests and diseases of quarantine importance
- 96/126 - Geographical distribution of Russian A2 quarantine pests in Russia: pathogens and weeds
- 96/132 - Situation of tomato yellow leaf curl geminivirus in Iran
- 96/135 - Situation of pear decline phytoplasma in Spain
- 96/144 - Situation of fireblight in Switzerland
- 96/145 - *Erwinia amylovora* in ex-Yugoslavia
- 96/151 - Beet curly top geminivirus is present on *Capsicum annuum* in Oregon (US)
- 96/156 - Control of *Anoplophora chinensis* in China
- 96/157 - First report of *Heterodera glycines* in South Dakota
- 96/163 - Information on pests and diseases of quarantine importance in Croatia
- 96/168 - First report of *Bursaphelenchus xylophilus* in Oregon (US)
- 96/172 - Situation of cherry little cherry disease in Germany
- 96/176 - Peach latent mosaic viroid in commercial peach and nectarine cultivars in USA
- 96/182 - Situation of *Burkholderia (Pseudomonas) solanacearum* in the Netherlands
- 96/187 - Situation of *Globodera pallida* and *G. rostochiensis* in the former German Democratic Republic
- 96/195 - New and detailed records for Brazil
- 96/196 - Situation of *Xylella fastidiosa* in Brazil
- 96/197 - Occurrence of *Heterodera glycines* in the State of São Paulo (BR)
- 96/200 - Occurrence of palm lethal yellowing phytoplasma in Honduras
- 96/204 - New data on pests and diseases of plant quarantine importance
- 96/208 - Situation of *Bursaphelenchus xylophilus* and *Monochamus alternatus* in Korea Republic
- 96/209 - Details on the geographical distribution of beetles of plant quarantine importance in Canada and Alaska
- 96/210 - Forest insects present in Mexico
- 96/213 - Further spread of *Gonipterus scutellatus* in Spain
- 96/215 - Update on the situation of citrus tristeza closterovirus in Mexico
- 96/216 - Situation of citrus tristeza closterovirus in Cyprus

Detection/Identification methods

- 96/013 - PCR detection of tomato ringspot nepovirus
- 96/018 - Detection kit for tomato spotted wilt and impatiens necrotic spot tospoviruses
- 96/035 - Specific ELISA detection of the Andean strain of potato S carlavirus
- 96/045 - Differentiation of three *Bursaphelenchus* species by RAPD-PCR
- 96/101 - PCR method to identify *Xanthomonas axonopodis* pv. *citri* (*X. campestris* pv. *citri*)
- 96/102 - PCR method to identify *Tilletia indica*
- 96/148 - New detection method for *Erwinia amylovora*
- 96/153 - PCR method to detect both *Xanthomonas axonopodis* pv. *phaseoli* and *Pseudomonas syringae* pv. *phaseolicola* in bean seeds

EPPO Reporting Service

- 96/171 - Comparison of PCR, ELISA and DNA hybridization for the detection of *Clavibacter michiganensis* subsp. *sepedonicus*
- 96/188 - Identification of potato cyst nematodes by using PCR
- 96/189 - New sampling method to detect low populations of *Globodera rostochiensis* and *G. pallida*

Diabrotica barberi

- 96/155 - Studies on development rate of *Diabrotica barberi*
- 96/209 - Details on the geographical distribution of beetles of plant quarantine importance in Canada and Alaska

Diabrotica virgifera

- 96/005 - First report of *Diabrotica virgifera* in Croatia
- 96/006 - Situation of *Diabrotica virgifera* in Serbia (YU)
- 96/007 - Situation of *Diabrotica virgifera* in Hungary
- 96/103 - Workshop on *Diabrotica virgifera*, Hódmezővásárhely (HU), 1996-03-19
- 96/165 - First report of *Diabrotica virgifera* in Romania
- 96/209 - Details on the geographical distribution of beetles of plant quarantine importance in Canada and Alaska
- 96/221 - Damage of *Diabrotica virgifera* to maize following soybean in USA

Dialeurodes citri

- 96/031 - Citrus whiteflies in Spain

Diaporthe helianthi

- 96/126 - Geographical distribution of Russian A2 quarantine pests in Russia: pathogens and weeds

Diaporthe phaseolorum var. caulivora

- 96/126 - Geographical distribution of Russian A2 quarantine pests in Russia: pathogens and weeds

Diaprepes abbreviatus

- 96/121 - News from the Diagnostic Centre of the Dutch Plant Protection Service

Didymella ligulicola

- 96/088 - Information of pests and diseases of quarantine importance in Slovakia

Ditylenchus destructor

- 96/088 - Information of pests and diseases of quarantine importance in Slovakia

Distribution Lists

- 96/067 - EPPO Distribution List of *Bactrocera cucurbitae*
- 96/068 - EPPO Distribution List for *Dacus ciliatus*
- 96/069 - EPPO Distribution List for *Ceratitis capitata*, *C. cosyra* and *C. rosa*
- 96/104 - EPPO Distribution List for *Erwinia chrysanthemi*
- 96/111 - EPPO Distribution List for *Liriomyza sativae*
- 96/129 - EPPO Distribution List for *Alternaria mali*
- 96/142 - Situation of *Phyllocnistis citrella* in the EPPO region
- 96/146 - EPPO Distribution List of *Erwinia amylovora*
- 96/159 - EPPO Distribution List for *Heterodera glycines*
- 96/177 - Tentative EPPO Distribution List for peach latent mosaic viroid

EPPO *Reporting Service*

- 96/178 - Tentative distribution list for peach mosaic disease
96/184 - EPPO Distribution List for *Burkholderia solanacearum*

Dominican Republic

- 96/047 - Citrus blight is present in the Dominican Republic

Dryocoetes confusus

- 96/209 - Details on the geographical distribution of beetles of plant quarantine importance in Canada and Alaska

Elsinöe fawcettii

- 96/204 - New data on pests and diseases of plant quarantine importance

Epitrix cucumeris, E. tuberosa

- 96/209 - Details on the geographical distribution of beetles of plant quarantine importance in Canada and Alaska

EPPO/OEPP

- 96/002 - Situation of *Burkholderia (Pseudomonas) solanacearum* in the EPPO region
96/021 - EPPO Electronic Documentation Service
96/061 - EPPO Electronic Documentation Service - update
96/124 - EPPO Electronic Documentation Service : REMINDER!
96/127 - Views of the EPPO Working Party on Phytosanitary Regulations on *Tilletia indica*
96/142 - Situation of *Phyllocnistis citrella* in the EPPO region
96/143 - New EPPO summary of Phytosanitary Regulations of Turkey
96/162 - Illustrations of Quarantine Pests for Europe
96/202 - EPPO Electronic Documentation Service : REMINDER!
96/225 - EPPO Reporting Service Index
96/226 - Directory of Plant Protection Services of EPPO Member Countries

Erwinia amylovora

- 96/004 - First report of fireblight in Croatia
96/023 - Fireblight foci in Puy-de-Dôme (FR)
96/043 - New data on diseases of quarantine importance
96/074 - Phytosanitary situation of fruit crops in Albania
96/100 - Genetic studies of *Erwinia amylovora* strains isolated from fruit trees and *Rubus* spp.
96/106 - First report of *Erwinia amylovora* in Hungary
96/107 - First report of *Erwinia amylovora* in Spain
96/108 - Is *Erwinia amylovora* present in Japan ?
96/144 - Situation of fireblight in Switzerland
96/145 - *Erwinia amylovora* in ex-Yugoslavia
96/146 - EPPO Distribution List of *Erwinia amylovora*
96/147 - Streptomycin resistance of *Erwinia amylovora* in Israel
96/148 - New detection method for *Erwinia amylovora*

Erwinia chrysanthemi

- 96/043 - New data on diseases of quarantine importance
96/044 - 19th Session of the Asia and Pacific Plant Protection Commission (APPPC)
96/104 - EPPO Distribution List for *Erwinia chrysanthemi*

EPPO Reporting Service

Erwinia stewartii (see Pantoea stewartii subsp. stewartii)

Estonia

- 96/002 - Situation of *Burkholderia (Pseudomonas) solanacearum* in the EPPO region
- 96/003 - Decline diseases of *Prunus* in Europe are now considered as due to European stone fruit yellows
phytoplasma
- 96/033 - Report of phytoplasma infection in European plums in Italy

Eutetranychus orientalis

- 96/204 - New data on pests and diseases of plant quarantine importance

FAO

- 96/160 - List of Contracting Parties to the International Plant Protection Convention
- 96/161 - FAO/IPGRI Technical Guidelines for the safe movement of *Musa* spp. (2nd edition)
- 96/222 - FAO/IPGRI Technical Guidelines for the safe movement of stone fruits and *Eucalyptus* sp.

Finland

- 96/002 - Situation of *Burkholderia (Pseudomonas) solanacearum* in the EPPO region

Fusarium oxysporum f. sp. albedinis

- 96/219 - Genetic studies on *Fusarium oxysporum* f. sp. *albedinis*

Fusarium subglutinans f. sp. pini

- 96/070 - Occurrence of *Fusarium subglutinans* f.sp. *pini* in South Africa

France

- 96/022 - Situation of *Burkholderia (Pseudomonas) solanacearum* in France and Portugal
- 96/023 - Fireblight foci in Puy-de-Dôme (FR)
- 96/040 - *Metcalfa pruinosa*: a new pest in Europe
- 96/136 - Pear decline phytoplasma found on Japanese pear in France
- 96/150 - First report of *Matsucoccus feytaudi* in Corsica (FR)
- 96/181 - Changes in telephone numbers in France

Frankliniella occidentalis

- 96/038 - Treatments of orchid blossoms against *Thrips palmi* and *Frankliniella occidentalis*
- 96/044 - 19th Session of the Asia and Pacific Plant Protection Commission (APPPC)
- 96/078 - Influence of trap shape, size and background colour on captures of *Frankliniella occidentalis*
- 96/087 - New data on pests of quarantine importance
- 96/088 - Information of pests and diseases of quarantine importance in Slovakia
- 96/198 - Tospoviruses and thrips

French Guiana

- 96/063 - Situation of *Bactrocera carambolae* in Suriname, Guyana and French Guiana

Geminiviruses

- 96/011 - Molecular studies on tomato yellow leaf curl geminivirus isolates from the Mediterranean region
- 96/012 - Studies on resistance to tomato yellow mosaic geminivirus
- 96/044 - 19th Session of the Asia and Pacific Plant Protection Commission (APPPC)
- 96/054 - New geminivirus of tomato in Mexico

EPPO Reporting Service

- 96/112 - First report of tomato yellow leaf curl geminivirus and *Bemisia tabaci* in Portugal
- 96/130 - Tomato mottle geminivirus found in Puerto Rico
- 96/131 - First report of tomato yellow leaf curl geminivirus and tomato ringspot nepovirus in Pakistan
- 96/132 - Situation of tomato yellow leaf curl geminivirus in Iran
- 96/151 - Beet curly top geminivirus is present on *Capsicum annuum* in Oregon (US)
- 96/152 - Weeds naturally infected by beet curly top geminivirus
- 96/195 - New and detailed records for Brazil
- 96/220 - New strains of potato spindle tuber viroid and Australian tomato leaf curl bigeminivirus from a wild *Solanum* sp. in Australia

Germany

- 96/002 - Situation of *Burkholderia (Pseudomonas) solanacearum* in the EPPO region
- 96/029 - *Tilletia controversa* is not present in Germany
- 96/087 - New data on pests of quarantine importance
- 96/125 - New data on pests and diseases of quarantine importance
- 96/172 - Situation of cherry little cherry disease in Germany
- 96/187 - Situation of *Globodera pallida* and *G. rostochiensis* in the former German Democratic Republic
- 96/205 - Occurrence of *Meloidogyne chitwoodi* in Germany

Globodera pallida

- 96/088 - Information of pests and diseases of quarantine importance in Slovakia
- 96/187 - Situation of *Globodera pallida* and *G. rostochiensis* in the former German Democratic Republic
- 96/188 - Identification of potato cyst nematodes by using PCR
- 96/189 - New sampling method to detect low populations of *Globodera rostochiensis* and *G. pallida*

Globodera rostochiensis

- 96/088 - Information of pests and diseases of quarantine importance in Slovakia
- 96/120 - Geographical distribution of Russian A2 quarantine pests in Russia: insects and nematodes
- 96/187 - Situation of *Globodera pallida* and *G. rostochiensis* in the former German Democratic Republic
- 96/188 - Identification of potato cyst nematodes by using PCR
- 96/189 - New sampling method to detect low populations of *Globodera rostochiensis* and *G. pallida*
- 96/204 - New data on pests and diseases of plant quarantine importance

Gnathotrichus sulcatus

- 96/209 - Details on the geographical distribution of beetles of plant quarantine importance in Canada and Alaska
- 96/210 - Forest insects present in Mexico

Gonipterus scutellatus

- 96/049 - Situation of *Gonipterus scutellatus* in Spain
- 96/213 - Further spread of *Gonipterus scutellatus* in Spain

Grapevine flavescence dorée phytoplasma

Grapevine yellows

- 96/125 - New data on pests and diseases of quarantine importance

Gremmeniella abietina

- 96/088 - Information of pests and diseases of quarantine importance in Slovakia

Guam

- 96/053 - *Bemisia tabaci* biotype B in the Pacific region

EPPO Reporting Service

Guatemala

96/066 - Development of traps for *Ceratitis capitata* and *Anastrepha ludens*

Guernsey

96/002 - Situation of *Burkholderia (Pseudomonas) solanacearum* in the EPPO region

Guignardia citricarpa

96/195 - New and detailed records for Brazil

Guinea

96/052 - *Phaeoramularia angolensis* is present in Guinea

Guyana

96/063 - Situation of *Bactrocera carambolae* in Suriname, Guyana and French Guiana

Helicoverpa armigera

96/044 - 19th Session of the Asia and Pacific Plant Protection Commission (APPPC)

96/087 - New data on pests of quarantine importance

96/088 - Information of pests and diseases of quarantine importance in Slovakia

96/089 - Czech Republic: occurrence of *Liriomyza huidobrensis* and eradication of *Helicoverpa armigera*

96/141 - Damage of *Helicoverpa armigera* on grapevine in Hungary

96/204 - New data on pests and diseases of plant quarantine importance

Heterodera glycines

96/157 - First report of *Heterodera glycines* in South Dakota

96/158 - *Heterodera glycines* is not present in Chile

96/159 - EPPO Distribution List for *Heterodera glycines*

96/197 - Occurrence of *Heterodera glycines* in the State of São Paulo (BR)

Honduras

96/200 - Occurrence of palm lethal yellowing phytoplasma in Honduras

Hong Kong

96/044 - 19th Session of the Asia and Pacific Plant Protection Commission (APPPC)

Hungary

96/002 - Situation of *Burkholderia (Pseudomonas) solanacearum* in the EPPO region

96/007 - Situation of *Diabrotica virgifera* in Hungary

96/010 - Situation of beet necrotic yellow vein furovirus in Hungary

96/015 - Tomato spotted wilt tospovirus is present in Hungary

96/106 - First report of *Erwinia amylovora* in Hungary

96/141 - Damage of *Helicoverpa armigera* on grapevine in Hungary

Hyphantria cunea

96/025 - *Hyphantria cunea* found in Tessin (CH)

96/088 - Information of pests and diseases of quarantine importance in Slovakia

96/120 - Geographical distribution of Russian A2 quarantine pests in Russia: insects and nematodes

96/210 - Forest insects present in Mexico

EPPO *Reporting Service*

Hypoxyton mammatum

96/088 - Information of pests and diseases of quarantine importance in Slovakia

Impatiens necrotic spot tospovirus

96/018 - Detection kit for tomato spotted wilt and impatiens necrotic spot tospoviruses

India

96/043 - New data on diseases of quarantine importance

96/044 - 19th Session of the Asia and Pacific Plant Protection Commission (APPPC)

96/110 - New records of *Liriomyza sativae* in Asia and Africa

96/125 - New data on pests and diseases of quarantine importance

96/137 - Citrus mosaic disease in India is associated with a badnavirus

96/204 - New data on pests and diseases of plant quarantine importance

Interception reports

96/060 - EPPO report on selected intercepted consignments

96/105 - EPPO report on selected intercepted consignments: last two months of 1995

96/122 - EPPO report on selected intercepted consignments

International Plant Protection Convention (IPPC)

96/160 - List of Contracting Parties to the International Plant Protection Convention

IPGRI

96/161 - FAO/IPGRI Technical Guidelines for the safe movement of *Musa* spp. (2nd edition)

96/222 - FAO/IPGRI Technical Guidelines for the safe movement of stone fruits and *Eucalyptus* sp.

Ips amitinus

96/201 - Additions and deletions to the EPPO A1 and A2 quarantine lists

Ips calligraphus

96/209 - Details on the geographical distribution of beetles of plant quarantine importance in Canada and

Alaska

96/210 - Forest insects present in Mexico

Ips confusus

96/210 - Forest insects present in Mexico

Ips duplicatus

96/088 - Information of pests and diseases of quarantine importance in Slovakia

Ips grandicollis

96/209 - Details on the geographical distribution of beetles of plant quarantine importance in Canada and

Alaska

96/210 - Forest insects present in Mexico

Ips lecontei

96/210 - Forest insects present in Mexico

EPPO Reporting Service

Ips pini

- 96/072 - Studies on transmission of blue-stain fungi by *Ips pini*
96/209 - Details on the geographical distribution of beetles of plant quarantine importance in Canada and Alaska
96/210 - Forest insects present in Mexico

Ips plastographus plastographus

- 96/209 - Details on the geographical distribution of beetles of plant quarantine importance in Canada and Alaska

Ips sexdentatus

- 96/088 - Information of pests and diseases of quarantine importance in Slovakia

Ips typographus

- 96/167 - *Ips typographus* reported in Canada
96/204 - New data on pests and diseases of plant quarantine importance

Iran

- 96/043 - New data on diseases of quarantine importance
96/065 - Geographical distribution of *Bactrocera cucurbitae* and *Dacus ciliatus*
96/132 - Situation of tomato yellow leaf curl geminivirus in Iran

Ireland

- 96/002 - Situation of *Burkholderia (Pseudomonas) solanacearum* in the EPPO region

ISO

- 96/084 - New ISO codes for country names

Israel

- 96/002 - Situation of *Burkholderia (Pseudomonas) solanacearum* in the EPPO region
96/048 - First report of *Oncastichus goughi* in Israel
96/065 - Geographical distribution of *Bactrocera cucurbitae* and *Dacus ciliatus*
96/133 - First report of *Colletotrichum acutatum* in Israel
96/147 - Streptomycin resistance of *Erwinia amylovora* in Israel

Italy

- 96/002 - Situation of *Burkholderia (Pseudomonas) solanacearum* in the EPPO region
96/033 - Report of phytoplasma infection in European plums in Italy
96/040 - *Metcalfa pruinosa*: a new pest in Europe
96/075 - Situation of peach latent mosaic viroid in Campania (IT)
96/076 - *Radopholus similis* and *Aphelenchoides besseyi* detected in Italy
96/093 - *Xanthomonas arboricola* pv. *pruni* (*X. campestris* pv. *pruni*) found in peach orchards in Lazio (IT)

Japan

- 96/108 - Is *Erwinia amylovora* present in Japan ?
96/109 - Potato spindle tuber viroid is not present in Japan

Jersey

EPPO Reporting Service

96/002 - Situation of *Burkholderia (Pseudomonas) solanacearum* in the EPPO region

Jordan

96/125 - New data on pests and diseases of quarantine importance

Korea, Republic of

96/044 - 19th Session of the Asia and Pacific Plant Protection Commission (APPPC)

96/208 - Situation of *Bursaphelenchus xylophilus* and *Monochamus alternatus* in Korea Republic

Latvia

96/002 - Situation of *Burkholderia (Pseudomonas) solanacearum* in the EPPO region

Leptinotarsa decemlineata

96/087 - New data on pests of quarantine importance

96/209 - Details on the geographical distribution of beetles of plant quarantine importance in Canada and Alaska

Lesotho

96/065 - Geographical distribution of *Bactrocera cucurbitae* and *Dacus ciliatus*

Lime witches' broom phytoplasma

96/032 - Proposed names for citrus greening bacterium and lime witches' broom phytoplasma

Liriomyza huidobrensis

96/089 - Czech Republic: occurrence of *Liriomyza huidobrensis* and eradication of *Helicoverpa armigera*

96/204 - New data on pests and diseases of plant quarantine importance

96/206 - First report of *Liriomyza huidobrensis* in Turkey

Liriomyza trifolii

96/044 - 19th Session of the Asia and Pacific Plant Protection Commission (APPPC)

96/088 - Information of pests and diseases of quarantine importance in Slovakia

96/125 - New data on pests and diseases of quarantine importance

96/204 - New data on pests and diseases of plant quarantine importance

Liriomyza sativae

96/110 - New records of *Liriomyza sativae* in Asia and Africa

96/111 - EPPO Distribution List for *Liriomyza sativae*

Lymantria dispar

96/014 - Differentiation between forms of *Lymantria dispar*

Maconellicoccus hirsutus

96/028 - Further spread of *Maconellicoccus hirsutus* in the Caribbean

96/207 - First report of *Maconellicoccus hirsutus* in Saint-Martin (Netherlands Antilles)

Malacosoma americanum

96/201 - Additions and deletions to the EPPO A1 and A2 quarantine lists

EPPO Reporting Service

Malacosoma disstria

96/071 - Occurrence of *Malacosoma disstria* in Pennsylvania (US)

Malta

96/002 - Situation of *Burkholderia (Pseudomonas) solanacearum* in the EPPO region

Matsucoccus feytaudi

96/150 - First report of *Matsucoccus feytaudi* in Corsica (FR)

Melampsora medusae

96/195 - New and detailed records for Brazil

Meloidogyne chitwoodi

96/085 - *Meloidogyne chitwoodi* - a meeting to present EU research project [URGENT!]

96/205 - Occurrence of *Meloidogyne chitwoodi* in Germany

Metcalfa pruinosa

96/040 - *Metcalfa pruinosa*: a new pest in Europe

Mexico

96/054 - New geminivirus of tomato in Mexico

96/092 - *Anastrepha* species trapped in tropical orchards in Mexico

96/099 - *Puccinia horiana* in North America

96/210 - Forest insects present in Mexico

96/215 - Update on the situation of citrus tristeza closterovirus in Mexico

Monochamus alternatus

96/208 - Situation of *Bursaphelenchus xylophilus* and *Monochamus alternatus* in Korea Republic

Monochamus carolinensis, M. marmorator, M. mutator, M. notatus, M. obtusus obtusus, M. scutellatus scutellatus, M. titillator

96/209 - Details on the geographical distribution of beetles of plant quarantine importance in Canada and Alaska

Morocco

96/043 - New data on diseases of quarantine importance

96/090 - Situation of *Burkholderia (Pseudomonas) solanacearum* in Cyprus and Morocco

Myanmar

96/044 - 19th Session of the Asia and Pacific Plant Protection Commission (APPPC)

96/065 - Geographical distribution of *Bactrocera cucurbitae* and *Dacus ciliatus*

NAPPO

96/036 - NAPPO quarantine lists for potato pests

Nauru

96/087 - New data on pests of quarantine importance

EPPO Reporting Service

Nepal

- 96/175 - Recent studies on peach latent mosaic viroid

Netherlands

- 96/001 - *Burkholderia (Pseudomonas) solanacearum* found again in the Netherlands
96/002 - Situation of *Burkholderia (Pseudomonas) solanacearum* in the EPPO region
96/121 - News from the Diagnostic Centre of the Dutch Plant Protection Service
96/182 - Situation of *Burkholderia (Pseudomonas) solanacearum* in the Netherlands
96/193 - Eradication of further outbreaks of *Thrips palmi* in the Netherlands
96/194 - Recent findings of *Clavibacter michiganensis* subsp. *michiganensis*, plum pox potyvirus and *Xanthomonas fragariae* in the Netherlands

Netherlands Antilles

- 96/207 - First report of *Maconellicoccus hirsutus* in Saint-Martin (Netherlands Antilles)

New Caledonia

- 96/053 - *Bemisia tabaci* biotype B in the Pacific region

New host plants

- 96/017 - New hosts plants of tomato spotted wilt tospovirus
96/055 - Tomato spotted wilt tospovirus causes a serious disease of chickpea (*Cicer arietinum*) in Brazil
96/087 - New data on pests of quarantine importance
96/097 - First report of *Arceuthobium americanum* on *Abies lasiocarpa*
96/098 - First report of Andean potato latent tymovirus in *Ullucus tuberosus*
96/121 - News from the Diagnostic Centre of the Dutch Plant Protection Service
96/134 - *Colletotrichum acutatum* on ornamental lupin in United Kingdom
96/136 - Pear decline phytoplasma found on Japanese pear in France
96/149 - Characterization of the sour cherry strain of plum pox potyvirus
96/169 - First report of *Xylella fastidiosa* in coffee
96/204 - New data on pests and diseases of plant quarantine importance
96/212 - *Cacoecimorpha pronubana* found on *Pinus halepensis* in Spain

New pests

- 96/041 - *Phytophthora* disease of common alder
96/042 - Potential spread of *Artioposthia triangulata* (New Zealand flatworm) and *Australoplana sanguinea* var. *alba* to continental Europe
96/054 - New geminivirus of tomato in Mexico
96/081 - New phytoplasma associated with cherry lethal yellows in China
96/082 - Chrysanthemum stem necrosis possibly due to a new tospovirus
96/173 - New virus disease of barley in Switzerland
96/211 - A new pest of horse chestnut: *Cameraria ohridella*
96/214 - Introduction of *Anoplophora glabripennis* in New York State (US)

New records

- 96/004 - First report of fireblight in Croatia
96/005 - First report of *Diabrotica virgifera* in Croatia
96/009 - Citrus tristeza closterovirus is present in St Lucia
96/015 - Tomato spotted wilt tospovirus is present in Hungary
96/024 - *Toxoptera citricida* found in Florida (US)
96/025 - *Hyphantria cunea* found in Tessin (CH)
96/028 - Further spread of *Maconellicoccus hirsutus* in the Caribbean

EPPO Reporting Service

- 96/040 - *Metcalfa pruinosa*: a new pest in Europe
- 96/043 - New data on diseases of quarantine importance
- 96/044 - 19th Session of the Asia and Pacific Plant Protection Commission (APPPC)
- 96/047 - Citrus blight is present in the Dominican Republic
- 96/048 - First report of *Oncastichus goughi* in Israel
- 96/049 - Situation of *Gonipterus scutellatus* in Spain
- 96/050 - Detection of potato stolbur phytoplasma in Spain
- 96/051 - *Phytophthora fragariae* var. *rubi* found in Chile
- 96/052 - *Phaeoramularia angolensis* is present in Guinea
- 96/062 - *Tilletia indica* in United States
- 96/065 - Geographical distribution of *Bactrocera cucurbitae* and *Dacus ciliatus*
- 96/066 - Development of traps for *Ceratitis capitata* and *Anastrepha ludens*
- 96/070 - Occurrence of *Fusarium subglutinans* f.sp. *pini* in South Africa
- 96/074 - Phytosanitary situation of fruit crops in Albania
- 96/087 - New data on pests of quarantine importance
- 96/088 - Information of pests and diseases of quarantine importance in Slovakia
- 96/089 - Czech Republic: occurrence of *Liriomyza huidobrensis* and eradication of *Helicoverpa armigera*
- 96/091 - First report of *Thrips palmi* in Brazil
- 96/094 - Detection of arabis mosaic nepovirus in Austria
- 96/096 - Introduction of the Asiatic palm weevil, *Rhynchophorus ferrugineus* into Spain

New Zealand

- 96/044 - 19th Session of the Asia and Pacific Plant Protection Commission (APPPC)
- 96/115 - *Ceratitis capitata* trapped in New Zealand
- 96/116 - *Bactrocera papayae* and *B. tryoni* trapped in New Zealand

EPPO Reporting Service

Norway

96/002 - Situation of *Burkholderia (Pseudomonas) solanacearum* in the EPPO region

Pakistan

96/044 - 19th Session of the Asia and Pacific Plant Protection Commission (APPPC)

96/131 - First report of tomato yellow leaf curl geminivirus and tomato ringspot nepovirus in Pakistan

96/175 - Recent studies on peach latent mosaic viroid

Palm lethal yellowing phytoplasma

96/200 - Occurrence of palm lethal yellowing phytoplasma in Honduras

Pantoea stewartii subsp. *stewartii* (*Erwinia stewartii*)

96/086 - Name changes for bacteria

96/139 - Studies on seed-transmission of *Pantoea (Erwinia) stewartii* subsp. *stewartii*

Papua New Guinea

96/204 - New data on pests and diseases of plant quarantine importance

Parabemisia myricae

96/031 - Citrus whiteflies in Spain

Paraguay

96/196 - Situation of *Xylella fastidiosa* in Brazil

Peach latent mosaic viroid

96/075 - Situation of peach latent mosaic viroid in Campania (IT)

96/175 - Recent studies on peach latent mosaic viroid

96/176 - Peach latent mosaic viroid in commercial peach and nectarine cultivars in USA

96/177 - Tentative EPPO Distribution List for peach latent mosaic viroid

Peach mosaic disease

Peach yellow mosaic disease

96/175 - Recent studies on peach latent mosaic viroid

96/178 - Tentative distribution list for peach mosaic disease

Pear decline phytoplasma

96/088 - Information of pests and diseases of quarantine importance in Slovakia

96/113 - First report of pear decline phytoplasma in Poland

96/135 - Situation of pear decline phytoplasma in Spain

96/136 - Pear decline phytoplasma found on Japanese pear in France

Phaeoisariopsis griseola

96/043 - New data on diseases of quarantine importance

Phaeoramularia angolensis

96/052 - *Phaeoramularia angolensis* is present in Guinea

Phoma exigua var. *foveata*

96/088 - Information of pests and diseases of quarantine importance in Slovakia

EPPO Reporting Service

Phoracantha semipunctata

96/087 - New data on pests of quarantine importance

Phthorimaea operculella

96/120 - Geographical distribution of Russian A2 quarantine pests in Russia: insects and nematodes

Phyllocnistis citrella

96/142 - Situation of Phyllocnistis citrella in the EPPO region

Phytophthora fragariae var. fragariae

96/088 - Information of pests and diseases of quarantine importance in Slovakia

Phytophthora fragariae var. rubi

96/051 - Phytophthora fragariae var. rubi found in Chile

Phytophthora spp.

96/041 - Phytophthora disease of common alder

Pissodes nemorensis, P. strobi, P. terminalis

96/209 - Details on the geographical distribution of beetles of plant quarantine importance in Canada and Alaska

Plasmopara halstedii

96/043 - New data on diseases of quarantine importance

96/088 - Information of pests and diseases of quarantine importance in Slovakia

Plum pox potyvirus

96/126 - Geographical distribution of Russian A2 quarantine pests in Russia: pathogens and weeds

96/149 - Characterization of the sour cherry strain of plum pox potyvirus

96/174 - Further studies on the non-transmission of plum pox potyvirus by pollen and seed

96/194 - Recent findings of Clavibacter michiganensis subsp. michiganensis, plum pox potyvirus and Xanthomonas fragariae in the Netherlands

Poland

96/002 - Situation of Burkholderia (Pseudomonas) solanacearum in the EPPO region

96/113 - First report of pear decline phytoplasma in Poland

Popillia japonica

96/120 - Geographical distribution of Russian A2 quarantine pests in Russia: insects and nematodes

96/209 - Details on the geographical distribution of beetles of plant quarantine importance in Canada and Alaska

Portugal

96/022 - Situation of Burkholderia (Pseudomonas) solanacearum in France and Portugal

96/112 - First report of tomato yellow leaf curl geminivirus and Bemisia tabaci in Portugal

EPPO *Reporting Service*

Potato spindle tuber viroid

- 96/109 - Potato spindle tuber viroid is not present in Japan
96/121 - News from the Diagnostic Centre of the Dutch Plant Protection Service
96/220 - New strains of potato spindle tuber viroid and Australian tomato leaf curl bigeminivirus from a wild *Solanum* sp. in Australia

Potato stolbur phytoplasma

- 96/050 - Detection of potato stolbur phytoplasma in Spain
96/088 - Information of pests and diseases of quarantine importance in Slovakia

Portugal

- 96/043 - New data on diseases of quarantine importance

***Pseudomonas caryophylli* (see *Burkholderia caryophylli*)**

- 96/088 - Information of pests and diseases of quarantine importance in Slovakia
96/099 - *Puccinia horiana* in North America

Puccinia pelargonii-zonalis

- 96/088 - Information of pests and diseases of quarantine importance in Slovakia
96/125 - New data on pests and diseases of quarantine importance

EPPO Reporting Service

Puerto Rico

96/130 - Tomato mottle geminivirus found in Puerto Rico

Quadraspidiotus perniciosus

96/074 - Phytosanitary situation of fruit crops in Albania

96/087 - New data on pests of quarantine importance

96/088 - Information of pests and diseases of quarantine importance in Slovakia

96/120 - Geographical distribution of Russian A2 quarantine pests in Russia: insects and nematodes

Quarantine lists

96/036 - NAPPO quarantine lists for potato pests

96/164 - Quarantine lists for Slovenia

96/201 - Additions and deletions to the EPPO A1 and A2 quarantine lists

Quarantine treatments

96/037 - Studies on the possible use of sulfuryl fluoride fumigation against *Ceratocystis fagacearum*

96/038 - Treatments of orchid blossoms against *Thrips palmi* and *Frankliniella occidentalis*

96/056 - Quarantine treatment to control *Ceratitidis capitata*, *Bactrocera cucurbitae* and *B. dorsalis* in papaya

96/057 - Quarantine treatment to control *Ceratitidis capitata*, *Bactrocera cucurbitae* and *B. dorsalis* in carambola

96/117 - Gamma irradiation of *Bactrocera minax* larvae

96/138 - Quarantine treatment against *Unaspis yanonensis* on Satsuma

96/154 - Detection of irradiated *Ceratitidis capitata*

Radopholus similis

96/076 - *Radopholus similis* and *Aphelenchoides besseyi* detected in Italy

Rhagoletis completa

96/201 - Additions and deletions to the EPPO A1 and A2 quarantine lists

Resistance

96/079 - Resistance of *Aonidiella aurantii* and *A. citrina* to organophosphates and carbamates

96/147 - Streptomycin resistance of *Erwinia amylovora* in Israel

Rhizoeus hibisci

96/121 - News from the Diagnostic Centre of the Dutch Plant Protection Service

Rhizomania (see beet necrotic yellow vein furovirus)

Rhynchophorus ferrugineus

96/096 - Introduction of the Asiatic palm weevil, *Rhynchophorus ferrugineus* into Spain

Romania

96/002 - Situation of *Burkholderia (Pseudomonas) solanacearum* in the EPPO region

96/008 - *Clavibacter michiganensis* subsp. *sepedonicus* is not present in Romania

96/165 - First report of *Diabrotica virgifera* in Romania

96/175 - Recent studies on peach latent mosaic viroid

EPPO *Reporting Service*

Russia
